

The Little Mermaid lived in a palace deep in the sea.

**The beautiful mermaid was happy to swim
and play with her sisters.**

But she was curious about the world above the sea.

Sister1 "I love swimming and playing the most."

Sister2 "Where shall we go today?"

Mermaid "How about visiting the human world?"

Sister3 "It's dangerous above the sea.
Let's go deeper into the sea."

Mermaid "How much fun would be the people
on the boat over there?"

**One day, a big storm hit the sea
and broke the prince's ship.**

The Little Mermaid swam quickly to save the prince.

Mermaid "The prince fell into the sea!"

Maid "Oh, the prince fell down!"

Princess "Prince, wake up".

Mermaid "Wish the prince safe..."

As people flocked, the Little Mermaid hid in the sea.

**A princess from a distant neighboring country
found the fallen prince and approached him.**

**The prince came to his senses and he thought that
the princess from the neighboring country saved him.**

**The Little Mermaid immediately went to the witch
who had granted her wish.**

Mermaid "Please make me into a human."

Witch "Engrave in your mind
that if love doesn't come true
you will dissolve into foam."

**The witch granted the Little Mermaid's wish
but took her voice instead.**

Prince "Someone fell into the sea! Are you okay?"

Mermaid "Uh huh..."

Prince "The princess who saved my life!
Will you marry me?"

Princess "My pleasure."

**The Little Mermaid looked at the prince and shouted,
but no voice came out.**

Mermaid "It was me who saved you!"

**Finally, the prince married the princess
from the neighboring country.**

Sister1 "If you stab the prince with this sword,
you can become a mermaid again."

Mermaid "I can't kill the prince who I love..."

Sister1 "Stab the prince's heart with this sword!"

Sister2 "Then you can be a mermaid again!"

Sister3 "You can live happily like before."

**The Little Mermaid's sisters came and handed her a sword.
But she couldn't kill her beloved prince.**

**In the end, the Little Mermaid jumped into the sea
and dissolved into foam.**
